

1130S

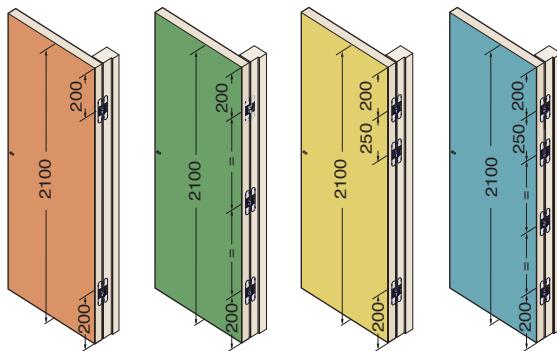

mm.134x24

Modelo patenteado
Dobradiças invisíveis
reguláveis para portas

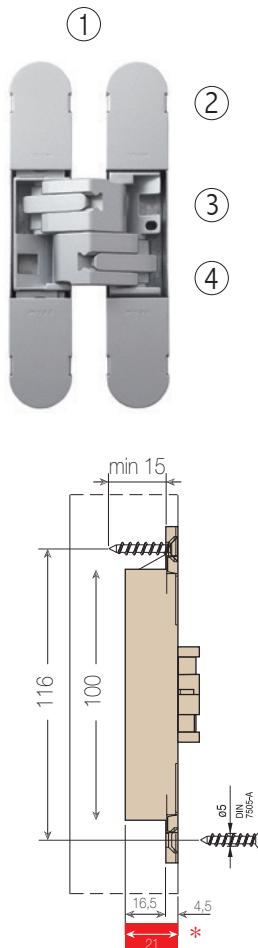

CARACTERÍSTICAS:

- Fabricada em Zamak e caixa externa em zamak zinkado que resiste a oxidação.
- Acabamentos em aço inox.
- Adequada para uma espessura mínima de 30mm.
- Comprimento total: 134mm.
- Profundidade apenas: 21mm.
- Regulagem Tridimensional.
- Capacidade de carga: 65kg (uso de 3 dobradiças).
- Fácil instalação e simetria na usinagem.
- Certificação para portas até 1.000mm de largura.
- Mecanismo com desempenho preciso, fluido e durável.

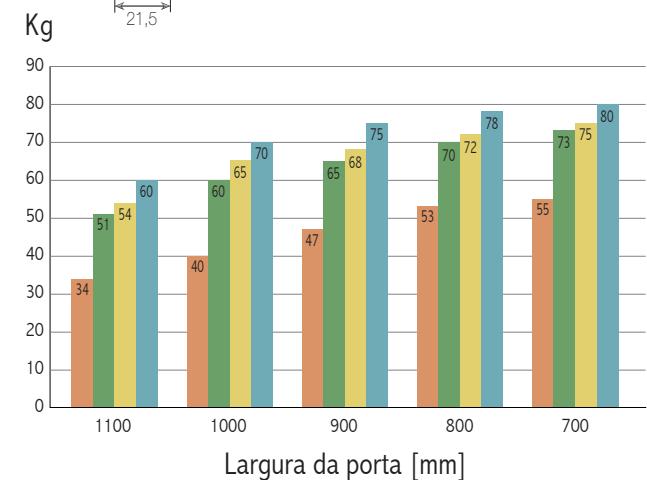

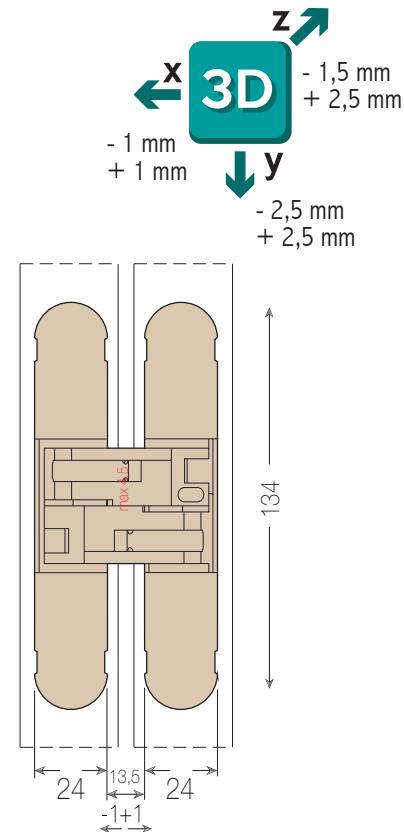

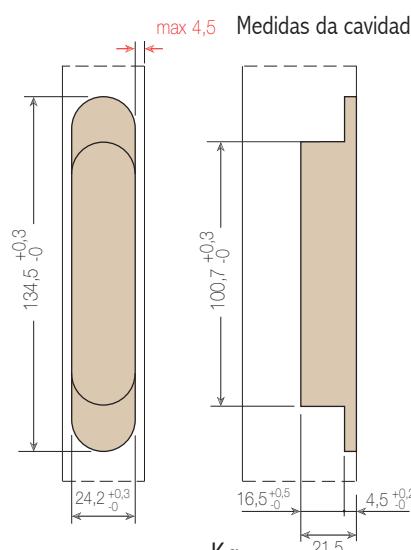

Tabela de capacidade de carga

- 2 dobradiças
- 3 dobradiças simétricas
- 3 dobradiças assimétricas
- 4 dobradiças

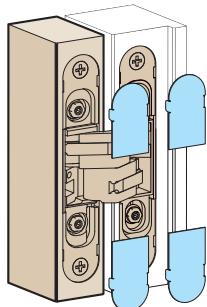

- ① Mecanismo fabricado em Zamak
- ② Acabamento em aço inox
- ③ Caixa interna em Zamak
- ④ Caixa externa em Zamak zinkado
